

## CITRISOLVE™

# Emulsifiable Solvent Cleaner & Degreaser Technical Information

Citrisolve is a blend of d-limonene, aliphatic hydrocarbon solvents and emulsifying agents. Citrisolve is designed to remove heavy contamination from hard surfaces and parts. It has also found applications for the removal of oil, grease, ink, glue, resin and bitumen deposits from tools, machinery and floors.

Primary features attributable to Citrisolve are:

- Safe, non-toxic solvent cleaner, based on natural products;
- Contains no aromatic components;
- Effective heavy duty cleaner for a wide variety of soils;
- User & Environment friendly.

---

### Applications

Citrisolve cleaner is ideal as a heavy duty emulsifiable degreaser in workshops and factories. Citrisolve may also be beneficial as a safe, non-toxic, biodegradable cleaner for drains, gullies and traps.

---

### Compatibility

Citrisolve may be safely applied to steel, aluminium, titanium, magnesium, zinc and other metal surfaces.

Citrisolve is compatible with a wide range of plastics and elastomers at room temperature; however specific materials should be tested prior to exposure.

Certificate No. GB06/69741

Solutions  
For Industry

## Health and Safety

Citrisolve is classified as Harmful and Flammable.

Users should avoid eye and skin contact and wear suitable personal protective equipment.

Product is fully biodegradable and non-bioaccumulative.

Use in well-ventilated areas and avoid eating, drinking and smoking.

See Safety Data Sheet for details.

---

## Typical Properties

Appearance	Clear, colourless liquid
Odour	Citrus smell
Density, g/cm <sup>3</sup> at 20 °C	0.82
Solubility in water	Emulsifies
pH	Not applicable
Flash Point (closed cup, °C)	63

Storage life in original, unopened containers, at between 5 °C and 35 °C (41° to 95 °F), is not less than 36 months. Keep containers closed when not in use.

---

## Directions for Use

### Application:

Use direct from the container for heavy duty cleaning applications, or between 1 part Citrisolve and 5 parts water and 1 part Citrisolve to 10 parts water for lesser degrees of soiling.

Apply the cleaner by brush or spray.

Allow the cleaner to lie in contact with the soil for a few minutes to enable the soil to softened and loosened. Stubborn soils should be agitated using a stiff bristle brush or fibre pad to assist removal.

Finally wash off cleaner and soil debris using clean water.

To clean fats and greases from drains and gullies, apply neat cleaner and after a few minutes flush through with warm water.
