

VIRUFOAM™

Alcohol free Anti-microbial Foam Hand Rub Technical Information

ViruFoam is a powerful anti-microbial hand rub that is dispensed as a foam to provide a controlled delivery application and to improve effective spread of the product over the skin surface. ViruFoam contains didecyldimethylammonium chloride and chlorhexidine gluconate as the active components and is formulated without using alcohol to make it kinder on the skin.

Primary features attributable to ViruFoam are:

- Non-flammable
- Alcohol free
- Effective anti-microbial action;
- Fast acting;
- Simple foam based application.

Applications

ViruFoam may be advantageously used in hospitals, nursing homes, doctors, dental surgeries and veterinary practices for hand sanitising applications. ViruFoam may also find application in the food industry, catering and hotel sectors.

The product is supplied in a plastic container with a foaming dispensing head.

Compatibility

ViruFoam is a pH neutral product and has a broad compatibility with materials and fabrics normally encountered during normal recommended use.

Health and Safety

**Infection
Controlled**

ViruFoam is classified as Dangerous if swallowed and is hand safe.
The product is not flammable and is biodegradable.

See Safety Data Sheet for details.

Typical Properties

Appearance	Clear colourless liquid
Odour	None
pH,	6.5 units (neat fluid)
Density, g/cm ³ @ 20 °C	1.00
Solubility in water	Completely miscible
Flash Point (Abel closed cup)	None

Storage Life: Concentrate – Not less than 3 years in unopened original containers when stored between 5 °C and 25 °C out of direct sunlight.

Efficacy:

- 1) Passes the requirement of EN 1500 – Chemical disinfectant and antiseptics – hygienic handrub – test method & requirements (phase 2, step 2).
